Title : Fund of Applying Maximo Enterprise Asset Mgmt Sol '09

1. What is a rotating item?

A. A rotating item is an individual item that is defined with a common item number. An item is designated as rotating because one wants to be able to create individual asset records by using the information (Classification, Specification, and Item Assembly Structure) contained on the item record.

B. A rotating item is a set of items that are defined with a specific code. An item is designated as rotating because one does not want to be able to create individual asset records by using the information (Classification, Specification, and Item Assembly Structure) contained on the item record.

C. A rotating item is a set of kits that are defined with a specific description and GL. An item is designated as rotating because one has the single cost to manage prefers to be able to create individual asset records by using the information (Classification, Specification, and Item Assembly Structure) contained on the assembly record.

D. A rotating item is an individual item that is defined with a common item number and can be a spare part. An item is designated as rotating because one wants to be able to create multiple asset records by using the information (Classification, Specification, and Item Assembly Structure) contained on the item set records.

Answer: A

2. Which three benefits do Enterprise Asset Management solutions provide? (Choose three.)

A. Reduce asset life.

B. Increase productivity.

C. Increase risk and costs.

D. Improve return on assets.

E. Reduce total cost of ownership.

F. Minimize collection on warranty claims.

Answer: BDE

3. When discussing plant maintenance with plant maintenance managers, frequently the topic of using preventive maintenance (PM) comes up. If this is used extensively and the PM work orders are regularly completed, what is told by this about the operation?

A. It is likely that equipment will break down frequently.

B. It is likely that equipment will break down infrequently.

C. It shows that maintenance is performed on an as needed basis.

D. It shows that there are frequent crises when it comes to maintaining equipment.

Answer: B

4. Which two aspects of the client's environment will help determine sizing of the solution? (Choose two.)

A. the number of users

B. the number of locations

C. the number of types of hardware

D. the number of security protocols

E. the number of types of operating systems

Answer: AB

5. Which two internet browsers are supported with IBM Maximo Asset Management V7.1? (Choose two.)

- A. Opera
- B. Netscape
- C. Mozilla Firefox
- D. Google Chrome
- E. Microsoft Internet Explorer

Answer: CE

6. A customer's plant maintenance manager invites a solution advisor to discuss Enterprise Asset Management in general and how it might help the maintenance group work more effectively and efficiently.

What should the solution advisor do in the first meeting with the plant maintenance manager?

- A. Ask the plant maintenance manager about the company's history, competition, and market value.
- B. Ask the plant maintenance manager about their background, education, and professional experience.
- C. Ask the plant maintenance manager about current systems in use, issues with the system, and key areas where the manager wants to see improvements.
- D. Ask the plant maintenance manager about the number of employees, union representation, and how IBM Maximo Asset Management can represent employees and their skill sets.

Answer: C

7. With which three other business initiatives does Enterprise Asset Management-a business paradigm-integrate strategic planning? (Choose three.)

- A. sales
- B. operations
- C. maintenance
- D. balance sheet
- E. human resources
- F. capital investment decision-making

Answer: BCF

8. A competitor in the IBM Maximo Asset Management (IMAM) domain claims that their product contains pre-built workflows and common tasks that span and integrate across asset applications.

What should a solution advisor do when a customer is considering such a solution?

- A. Dispute the vendor's claims that these pre-built workflows even exist.
- B. Inform the organization that workflow is an unimportant component in asset .
- C. Inform the organization that all vendors have the same pre-built workflows incorporated in their products.
- D. Inform the customer that if current business processes do not exactly match these workflows, customization is required.

Answer: D

9. What will happen to associated preventive maintenance (PM) records when an asset is decommissioned?

- A. There is no automatic method to change the PM(s) status to INACTIVE.
- B. The PM(s) will become in INACTIVE if 'Change the Status of All Associated PM(s) to Inactive?' is checked while decommissioning the asset.
- C. The only way to change the status of the PM(s) to INACTIVE is to remove the assets from the PM(s) and then change the status of the PM(s) to INACTIVE.
- D. If the 'Change the Status of All Associated PM(s) to Inactive?' is not selected during decommissioning, the PM(s) status will remain ACTIVE; however, work order cannot be generated from the PM having a decommissioned asset.

Answer: B

10. What is a feature of the Integration Framework?

- A. Allow bulk importing of XML or flat files.
- B. Allow bulk importing from Excel spreadsheets.
- C. Allow bulk importing from external/legacy system.
- D. Allow bulk importing from one database platform to another.

Answer: A
