

2B0-015 Enterasys Networks Certification Enterasys Networks ES Wireless

Practice Exam: 2B0-015 Exams

Exam Number/Code: 2B0-015

Exam Name: ES Wireless

Questions and Answers: 90 Q&As

([Enterasys Networks Certification](#))

Exam : [2B0-015](#)

"ES Wireless", also known as 2B0-015 exam, is a Enterasys Networks certification. With the complete collection of questions and answers, TestInside has assembled to take you through 90 Q&As to your 2B0-015 Exam preparation. In the 2B0-015 exam resources, you will cover every field and category in Enterasys Networks Certification helping to ready you for your successful Enterasys Networks Certification.

Quality and Value for the 2B0-015 Exam TestInside Practice Exams for Enterasys Networks **Enterasys Networks Certification** Certification 2B0-015 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 2B0-015 Exam.

2B0-015 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Enterasys Networks Certification product experts, included the current newest 2B0-015 examination questions.

3. 100% Guarantee to Pass Your Enterasys Networks Certification exam and get your Enterasys Networks Certification Certification.

If you do not pass the Enterasys Networks Certification 2B0-015 exam (ES Wireless) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 2B0-015 Q&A ensure you pass the exam at your first try.

TestInside professional provide Enterasys Networks Certification 2B0-015 the newest Q&A, completely covers 2B0-015 test original topic. With our complete Enterasys Networks Certification resources, you will minimize your Enterasys Networks Certification cost and be ready to pass your 2B0-015 tests on Your First Try, 100% Money Back Guarantee included!

[Enterasys Networks 2B0-015](#) Test belongs to one of the Enterasys Networks Certification certified test, if needs to obtain the Enterasys Networks Certification certificate, you also need to participate in other related test, the details you may visit the [Enterasys Networks Certification](#) certified topic, in there, you will see all related Enterasys Networks Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 2B0-015 exam

2B0-015 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

2B0-015 exam questions updated on regular basis

Same type as the certification exams, 2B0-015 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 2B0-015 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo does not include the question's picture.

Exam : Enterasys Networks 2B0-015

Title : ES Wireless

1. What media access method does the RoamAbout use?

- A. CSMA/CD
- B. Beacon exchange
- C. Binary Sequential Back off
- D. CSMA/CA

Answer: D

2. IEEE 802.11 stipulates the use of which security measure to make the wireless network at least as secure as a normal wired LAN?

- A. Host key generation
- B. WEP Encryption
- C. 802.1X Authentication
- D. A lockable security box for the Access Point

Answer: B

3. Which of the following is NOT a source of radio interference?

- A. Microwave ovens
- B. Overhead power lines
- C. Cable TV
- D. Theft detection devices

Answer: C

4. What are two solutions to a "Hidden Station" problem?

- A. Enable the RTS/CTS Protocol
- B. Increase the transmission power of the station
- C. Increase the Density setting
- D. Move the problem station

Answer: AD

5. Why is it important to read Release Notes when installing a wireless PC Card and its drivers?

- A. To enable you to decipher LED indications
- B. They include a PC Card license key
- C. To learn about restrictions and requirements for your OS
- D. To learn what channels are supported in your geographic region

Answer: C

6. What RMON groups are supported on the RoamAbout APs?

- A. Statistics, Host, Alarm, Packet Capture
- B. Statistics, History, Alarm, Events

- C. History, Alarm, Matrix, Filter
- D. All nine groups are supported

Answer: B

7. Where would you look to find what MIBs are supported on the RoamAbout Access Points?

- A. Firmware release notes
- B. Guide to Wireless LANs
- C. The Help file in your NMS
- D. In the device .cfg file

Answer: A

8. What file extension is used for RoamAbout Boot ROM image files?

- A. .txt
- B. .asp
- C. .WEP
- D. .BIN

Answer: D

9. What is the name of AP Manager integrated BootP/TFTP server application?

- A. RAT
- B. NetRider
- C. NetSight Atlas
- D. NCM_PCOV

Answer: B

10. Up to how many buildings may be connected in a Point-to-Multipoint configuration?

- A. 3
- B. 7
- C. 8
- D. 12

Answer: B

11. When should an Upline Dump be enabled for the AP 2000?

- A. When configuring the AP for an upgrade to its firmware
- B. When troubleshooting a poor SNR
- C. When copying configurations from one AP to another
- D. When requested by a RoamAbout service representative

Answer: D

12. What is the default password on the R2?

- A. public
- B. admin
- C. password
- D. private

Answer: C

13. What does the RoamAbout employ, by default, to confirm successful frame delivery?

- A. The receiving station sends a MAC level acknowledgement
- B. Resolution by upper layer protocols (i.e., TCP) at the sending station
- C. The sending station sends a source frame to verify delivery
- D. There is no method of ensuring successful delivery

Answer: A

14. How do you avoid radio frequency interference within an area when positioning multiple APs with 802.11b PC Cards installed?

- A. Configure different network names on the APs
- B. Enable Secure Access
- C. Configure overlapping cells at least five channels apart
- D. Maintain at least 100 meters distance between APs

Answer: C

15. When configuring LAN-to-LAN Endpoint, which of the following do you need?

- A. Wired MAC Address of the remote Access Point
- B. Wireless MAC Address of the remote Access Point
- C. IP Address of the remote Access Point
- D. Different channels configured on both Access Points

Answer: B

16. In which of the following devices is the PC Radio Card NOT used?

- A. Laptops
- B. Carrier (adapter) modules
- C. Omni-directional antenna
- D. Wireless Ethernet Adapter

Answer: C

17. What type of cable is required to connect a terminal to the console port of the AP?

- A. Cross-over
- B. Straight-through Cat 5
- C. Null Modem DB9 to DB9
- D. Multi-Mode Fiber

Answer: C

18. With Secure Access enabled on an AP with an IEEE 802.11b PC Card installed, which of the following is true?

- A. The AP allows access to wireless clients that use "ANY" as the wireless network name
- B. The AP allows access to wireless clients that leave the wireless network name configuration blank
- C. The AP denies access to wireless clients that do not provide the proper access password
- D. The AP denies access to wireless clients that do not use the correct wireless network name

Answer: D

19. Which AP Manager utility is used during LAN-to-LAN installations to determine signal strength?

- A. Authentication
- B. Link test
- C. Integrity Check
- D. Site Monitor

Answer: B

20. Which of the following does NOT affect the size of a cell?

- A. Network utilization
- B. Radio frequency noise
- C. Transmit speeds
- D. Humidity

Answer: D
