

BI0-130 COGNOS Certification COGNOS Cognos 8 BI Modeler

Practice Exam: BI0-130 Exams

Exam Number/Code: BI0-130

Exam Name: Cognos 8 BI Modeler

Questions and Answers: 107 Q&As

([COGNOS Certification](#))

Exam : [BI0-130](#)

"Cognos 8 BI Modeler", also known as BI0-130 exam, is a COGNOS certification. With the complete collection of questions and answers, TestInside has assembled to take you through 107 Q&As to your BI0-130 Exam preparation. In the BI0-130 exam resources, you will cover every field and category in COGNOS Certification helping to ready you for your successful COGNOS Certification.

Quality and Value for the BI0-130 Exam TestInside Practice Exams for COGNOS **COGNOS Certification** Certification BI0-130 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the BI0-130 Exam.

BI0-130 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the COGNOS Certification product experts, included the current newest BI0-130 examination questions.

3. 100% Guarantee to Pass Your COGNOS Certification exam and get your COGNOS Certification Certification.

If you do not pass the COGNOS Certification BI0-130 exam (Cognos 8 BI Modeler) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside BI0-130 Q&A ensure you pass the exam at your first try.

TestInside professional provide COGNOS Certification BI0-130 the newest Q&A, completely covers BI0-130 test original topic. With our complete COGNOS Certification resources, you will minimize your COGNOS Certification cost and be ready to pass your BI0-130 tests on Your First Try, 100% Money Back Guarantee included!

[COGNOS BI0-130](#) Test belongs to one of the COGNOS Certification certified test, if needs to obtain the COGNOS Certification certificate, you also need to participate in other related test, the details you may visit the [COGNOS Certification](#) certified topic, in there, you will see all related COGNOS Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about BI0-130 exam

BI0-130 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

BI0-130 exam questions updated on regular basis

Same type as the certification exams, BI0-130 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free BI0-130 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : COGNOS BI0-130

Title : Cognos 8 BI Modeler

1. In Report Studio, why would an author set the scope when creating a filter?

- A. To specify which grouped data item to filter.
- B. To apply the filter after the data is aggregated.
- C. To make the filter required, optional or disabled.
- D. To apply the filter before the data is aggregated.

Answer: A

2. In Report Studio, where does a modeler enable or disable drill behavior on multi-dimensional data?

- A. On the Toolbar.
- B. From the Data menu.
- C. In the Properties pane.
- D. In the Insertable Objects pane.

Answer: B

3. In Report Studio, an author wants the cities listed in the City prompt to be based on the Country selected in the Country prompt. What property must the author define to accomplish this?

- A. Range
- B. Multi-Select
- C. Cascade source
- D. Default Selections

Answer: C

4. In Report Studio, based on the above crosstab, which relationship is true?

- A. Quantity and Revenue are peers.
- B. Order method is a peer of Retailer type.
- C. Sales territory is a peer of Order method.
- D. Sales territory is a peer of Quantity and Revenue.

Answer: A

5. What is true of a Framework Manager model of an operational database lacking a time dimension?

- A. Virtual star schema models require a time dimension for multi-fact queries.
- B. Report authors cannot create multi-fact, time-based queries.
- C. Time-based rollups for multi-fact queries may be difficult to handle.
- D. Report authors cannot create multi-fact, time-based queries unless using a union.

Answer: C

6. In Report Studio, if an author wants to add Revenue to a report, where can the author find Revenue if the package is based on an OLAP data source?

- A. In a level.
- B. In a hierarchy.
- C. In a query subject.
- D. In a measures dimension.

Answer: D

7. The groups and roles defined in the Cognos namespace can be used to assign access rights to which of the following Framework Manager objects?

- A. Query items.
- B. Data sources.
- C. Relationships.
- D. Parameter maps.

Answer: A

8. What technique can Framework Manager modelers use to implement a time dimension for models that lack a time dimension?

- A. Create relationships from date fields in one dimension to date fields in another dimension.
- B. Use parameter maps to map date values in one query subject to date values in another query subject.
- C. Use the Time Dimension wizard to generate a time dimension and create the appropriate relationships.
- D. Identify a time dimension table source, import into the model and create relationships to fact query subjects.

Answer: D

9. Which of the following utilities can be used to update PowerCubes without affecting users?

- A. pcaccel.exe
- B. CubeSwap.bat
- C. RSUpgrade.bat
- D. BMTScriptPlayer.exe

Answer: B

10. If authors want to perform OLAP-style queries directly against a relational database, which Framework Manager modeling technique will a modeler use?

- A. Create regular and measure dimensions and set scope.
- B. Create shortcuts to regular dimensions and fact query subjects.
- C. Create star schema groupings for dimension and fact query subjects.
- D. Create relationships between regular dimensions and measure dimensions.

Answer: A

11. Which of the following techniques can be used to improve performance of PowerCubes in Cognos 8 BI?

- A. Run the cube through the pcoptimizer utility that is shipped with Cognos 8 BI.
- B. Enable the Allow dynamic usage of dimension information governor in Framework Manager.
- C. Edit the EnablePCOptimizer entry in the Cognos.ini file so that its value=1, and then rebuild the cube.
- D. Ensure that the Pass-through SQL setting is enabled on all regular dimensions in the Framework Manager model.

Answer: A

12. Based on the following graphic from Report Studio, what items can be accessed in the Members folder under Quarter?

- A. All members of the Years hierarchy.
- B. Only children of the Quarter members.
- C. Only the members in the Quarter level.
- D. All Quarter members and their children.

Answer: D

13. Which of the following is correct regarding the Cognos 8 security environment?

- A. Cognos 8 must be configured to use only one authentication provider at a time
- B. To perform authentication of users, a connection to the Cognos namespace must be defined
- C. In Framework Manager, object security is implemented by defining access to objects for users, groups and roles defined in the authentication providers
- D. In Framework Manager, object security is implemented by defining access to objects for groups and roles (of which

users are members), not individual users

Answer: C

14. In Report Studio, which item could be found in a package containing either relationally modeled data or dimensionally modeled relational data?

- A. Level
- B. Hierarchy
- C. Dimension
- D. Query item

Answer: D

15. In Report Studio, when would an author use the Condition Explorer?

- A. To add a page set to a report.
- B. To set the number of rows on a page.
- C. To create a report title that changes according to a locale.
- D. To navigate between report pages and prompt pages.

Answer: C

16. In Framework Manager, when using star schema groupings in the business view, conformed dimensions can be identified by which one of the following?

- A. Using a different query subject icon for display in the studios.
- B. Viewing the properties of the query subjects in Report Studio.
- C. Viewing the properties of the query subjects in Framework Manager.
- D. Using the same name for the dimension in each star schema grouping.

Answer: D

17. Which of the following statements is correct regarding the implementation of object security in Framework Manager?

- A. Groups and roles can be created in the Cognos namespace when specifying access to objects.
- B. Even when object security is applied, if anonymous access is configured, every object in a Framework Manager project is visible to everyone.
- C. A user belongs to two groups. One of the groups is denied access to an object. The other group is granted access to the object. The result is that user has access to the object.
- D. Granting access to an object for one user, group or role (except the Everyone and All Authenticated Users groups), implicitly denies access to that object for all other users, groups or roles.

Answer: D

18. In Report Studio, a modeler wants to create a calculation using items that exist in the current report. On which tab are these items available?

- A. Source tab
- B. Functions tab
- C. Data Items tab
- D. Parameters tab

Answer: C

19. The following report was created in Report Studio using a relational package and shows revenue by sales rep, city, and country. What will the report show if the author creates a detail filter for Revenue>500,000 and applies the filter BEFORE auto aggregation?

- A. Only reps who generated total revenue greater than 500,000.
- B. Only cities that generated total revenue greater than 500,000.
- C. Only countries that generated total revenue greater than 500,000.
- D. Only reps who had individual sales transactions of greater than 500,000.

Answer: D

20. In Report Studio, in which situation is it most appropriate to use a Repeater Table?

- A. Analyze financial data.
- B. Create a mailing list report.
- C. Compare values between and across items.
- D. Clarify information not easily seen in a crosstab or list.

Answer: B
